RE: Extension Request for Corrective Action Implementation, Case #1NHU248
359 Main Street, Fortuna, California
Former Unocal Bulk Plant #762248

Dear Ms. Ashley:

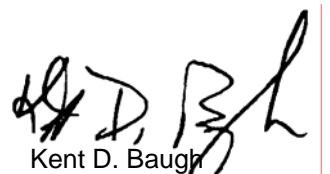

ENSR Corporation (ENSR), on behalf of Union Oil Company of California (Unocal), respectfully requests an extension to the implementation of the *Corrective Action Plan* (September 2005, ENSR) and the *Remedial Design Workplan* (February 2006, ENSR) for the former Unocal bulk plant in Fortuna.

As we discussed during our telephone conversation on June 15, 2006, Unocal is now owned by Chevron, and accordingly, the management of former Unocal sites must now comply with Chevron's standards of operation, which includes a remediation plan review by a technical team consisting of lead remediation personnel from Chevron and its key consultants. This remediation review process draws on Chevron's experience having remediated over 1,000 retail and terminal sites in the United States. While the Fortuna site has been identified for review by this Chevron Remediation System Review Team (RSRT) in the near future, a date has not been confirmed. When a date for this review has been established by Chevron, ENSR will notify you. Based on the RSRT's recommendations, ENSR will notify the North Coast Water Board (NCWB) of the recommended remedial approach and schedule for the Fortuna site. In the interim, ENSR will continue to monitor the site consistent with the NCWB-approved Monitoring and Reporting Plan R1-2004-008.

If you have any questions regarding this matter, please contact Jennifer Johnston of ENSR at (916) 288-4312.

Sincerely,
ENSR Corporation

Jennifer Johnston
